

Internships in broadcast media

I'm looking for an internship in broadcast.

I'm looking for an internship at an accredited media entity as part of my work intergrated learning experience. I'm currently at university learning towards a diploma in broadcast journalism. Internship at a radio station, production company or television station would be ideal.

If anyone reading this has information that they think might help, please share that with me and many others in my position.

I'd really appreciate the help thanx.
