

Small business laptop

"Small to medium business customers tell us they want PCs with bold yet professional designs, uncompromising durability and reliability with the latest technologies that meets their budgets," said Henry Ferreira, Lenovo country general manager. "Our answer is the new ThinkPad Edge family of laptops. They deliver stunning technology and powerful performance at an unprecedented value."

He was commenting on last week's announcement of the local availability of a new laptop series designed specifically for small to medium sized business (SMB) customers.

The 13-, 14- and 15-inch models are designed with style and affordability in mind for today's budget-conscious customers, feature rich, vibrant colour choices and a new contemporary keyboard.

Features:

- Spill-resistant keyboards
- Contemporary Keyboard
- Expanded Touchpad
- Long battery life of over eight hours
- Wireless connectivity technologies including WiFi and optional Bluetooth, 3G and WiMAX
- Voice Over Internet Protocol (VOIP) with Skype software
