

StarSat opens customer experience centre in Pretoria

StarSat opened its first customer experience centre in Pretoria on Saturday 5 July. It intends opening further centres in Johannesburg, Cape Town and Durban in the next few months.

Current and future subscribers living in Pretoria now have a dedicated team in their area to assist with the purchasing of new decoders, technical queries, subscriptions and installations.

"The launch of the centre is a clear indication that the company is committed to ensuring that its customers are able to receive a high level of service with the minimum amount of fuss," said Marius Liebenberg head: sales, StarTimes Media South Africa, the company that is the operational service provider to subscribers.
