

Unicef and Momentum Insure team up to protect and help keep children safe

Unicef South Africa and the National Department of Social Development have partnered with Momentum Insure to add youth-friendly activities to safe parks. The first activation took place in Klipspruit Safe Parks Centre last week to highlight the safety concerns of Soweto residents, especially those affecting children and to demonstrate the transformative power of safe parks. Momentum Insure staff members planted vegetable gardens, painted the park's fence, and incorporated painted handprints of all participants and kids, as well as played jenga, monopoly and chess with them.

Safe Parks provide a safe learning and playing environment where children can get support from a variety of professionals and caregivers.
