

Project Deep Space - The world's first six-wheel-drive, fully-electric hyper-GT

Hypercar manufacturer and high-performance vehicle creator, Hennessey, plans to toll out three all-new ground-up models created over the next decade, kicking off with Project Deep Space.

As part of its newly revealed 10-year product plan, the US-based automaker has revealed the first debut to follow the now sold-out 1,335kW hypercar Venom F5 coupe.

This aptly codenamed 'Project Deep Space', is being touted as the world's most expensive electric vehicle. Priced from \$3m, the new car will be a unique, ultra-luxurious, grand tourer. Moreover, it can transport four adults in absolute comfort along with four sets of golf clubs, plus luggage. Also, it is the world's first six-wheel-drive, fully electric Hyper-GT.
